

Strategic Areas Overview

Total LandCare · Reported achievements, July 2023 – June 2024

Total LandCare works to transform rural households into prosperous communities on healthy lands across Southern Africa. Its work is organised into five strategic areas.

Climate-Smart Agriculture

- 29,680 farmers practised conservation agriculture across about 10,547 hectares
- Worked with farmers in 17 macro-watersheds
- 4,755 local goats to 951 beneficiaries; 9,750 chickens to 638 beneficiaries
- 15,463 households supported with soybean and groundnut seed
- 30,780 farmers trained in manure making

Land Governance, Natural Resources Management and Carbon Trading

- 3,761 hectares placed under natural regeneration
- 2,555,860 trees planted
- 17,137 bamboo plants supported
- 32,156 households supported with cookstoves

Food, Nutrition and Health

- 539 children enrolled in 19 complementary feeding sessions; 427 graduated
- 4,406 households established backyard gardens
- 1,546 cooking demonstrations
- 45 water points rehabilitated, benefiting 1,931 households

Agribusiness, Finance and Markets

- 120 producer groups (6,000+ farmers) linked with buyers
- 593.57 metric tonnes sold, generating MK 666,419,936
- 12 EPA marketing committees established or revitalised
- 3,274 VSLAs supported, with savings of MK 3,304,127,372

Research and Development

- Development of pest models
- Testing and scaling push-pull and pheromone delta traps
- Conservation agriculture trials for maize and groundnuts

Figures are as reported on the TLC website for July 2023 – June 2024 and should not be read as current-year figures.
